

DELIVERED

Mission Automation

Four production solutions designed, built, and transitioned to government ownership inside the DoD's National Background Investigation Services program — **an ACAT I special-interest program**¹ under sustained GAO and congressional oversight. No new software licenses. No new authorization boundary.

ENGAGEMENT PROFILE

Client: DCSA Program Executive Office — NBIS Program Management Office. **Environment:** Microsoft 365 GCC High (FedRAMP High authorized) — SharePoint, Power Apps, Power Automate, Microsoft Forms. **Scope:** all four solutions designed, developed, deployed, demonstrated, and formally transitioned to government ownership. Every application was built inside the agency's existing Microsoft enterprise agreement and its existing authorization boundary — no new licenses procured, no new data repositories, no new ATO required.

APPLICATIONS DEVELOPED & DELIVERED - DCSA/NBIS PMO

01. POWER APPS • DELIVERED

NBIS Criticality Evaluation Form

Mission-assurance tool for evaluating the 11 essential NBIS systems against criticality, recovery prioritization, and resilience criteria. Supports recovery-objective (RTO/RPO) planning and program protection compliance requirements — replacing subjective judgment with a defensible, repeatable framework.

POWER APPS • DATAVERSE • RTO/RPO • PROGRAM PROTECTION

Outcome: Structured criticality framework replacing ad hoc assessment.

02. POWER APPS • DELIVERED

NBIS Staff List Application

Workforce accountability platform built in response to a government daily-accountability mandate. Automates personnel status tracking, daily accountability records, and organizational reporting — replacing a manual process that required sustained effort during organizational restructuring.

POWER APPS • DATAVERSE • WORKFORCE MGMT

Outcome: Manual personnel reclassification effort materially reduced during organizational restructuring; full compliance with the daily-accountability mandate.

03. POWER AUTOMATE • DELIVERED

Employee Occupancy Form

Automated daily accountability built on Microsoft Forms, Excel, and Power Automate. Creates an auditable occupancy record meeting federal personnel-tracking requirements, replacing manual sign-in with a compliant, automated pipeline that routes submissions without human intervention.

MS FORMS • POWER AUTOMATE • EXCEL • AUDIT TRAIL

Outcome: Mandate compliance with an auditable record trail replacing manual tracking.

04. SHAREPOINT • POWER AUTOMATE • DELIVERED

Situational Telework Request Form

SharePoint-based structured telework workflow with automated Business Office notification, enforcing policy requirements at the point of employee submission. Replaced an ad hoc email process with a standardized, policy-compliant workflow that routes approvals and retains records automatically.

SHAREPOINT • POWER AUTOMATE • APPROVAL ROUTING • POLICY ENFORCEMENT

Outcome: Ad hoc email process eliminated; policy compliance enforced at the point of submission.

DELIVERY APPROACH - TO GOVERNMENT OWNERSHIP

01. MISSION & COMPLIANCE ANALYSIS

Map the manual workflow to the federal mandate or policy requirement driving it. Align to the ATO boundary and data-governance constraints from the start.

02. DESIGN & CONFIGURE

Build within the government's existing GCC High tenant — Power Apps, Power Automate, SharePoint, Forms. No new procurement; DoD standards applied throughout.

03. DEPLOY & VALIDATE

Test and validate in the live government environment. User acceptance documented and compliance outcomes confirmed prior to government review.

04. GOVERNMENT TRANSITION

Train government personnel, document the architecture, and formally transfer ownership — leaving a self-sustaining capability in government hands.

SECURITY & PLATFORM POSTURE

Microsoft 365 GCC High

All solutions operate inside the government's own GCC High tenant — a FedRAMP High authorized, US-sovereign cloud boundary. Data never leaves the government's ATO boundary; CACG introduces no new authorization boundary.

DoD Cleared Facility

CACG holds a DoD facility clearance with cleared professionals supporting sensitive and classified program environments.

CMMI Maturity Level 3 (Services)

Appraisal ID 76310, appraised May 2025, valid through 15 May 2028 — delivery processes formally appraised, repeatable, documented, and auditable.

Section 508 Accessibility

Applications built and tested against the Revised Section 508 Standards (WCAG 2.0 Level AA) as government-managed devices and assistive technology require.
